MINITRUSS 6TCb

The MINITRUSS-6TCb is a compact projector based on one which has nothing left to prove.

Specially designed to fit in any 290 mm triangular structure, it is also perfect for your mobile installations. You will surely enjoy its ease of use with a DMX controller and its many built-in colours and programs.

It comes with 4 straps fasteners allowing you to attach your projector to any structure, at all heights, in any position.

High performance LEDs

With 6 x 3W trichromatic LEDs, the MINITRUSS-6TCb delivers a powerful, consistent light output.

M8

The M8 inserts located on the side and below the projector allow you to use hooks.

Advanced functions

The MINITRUSS-6TCb offers many different modes and adapt to any kind of installation.

The DMX mode allows you to use 2 to 6 channels.

The Auto mode gives you access to plenty of colour macros at variable speed, while the drop-down menu can be used to access other functions such as DMX and music-sensitive modes.

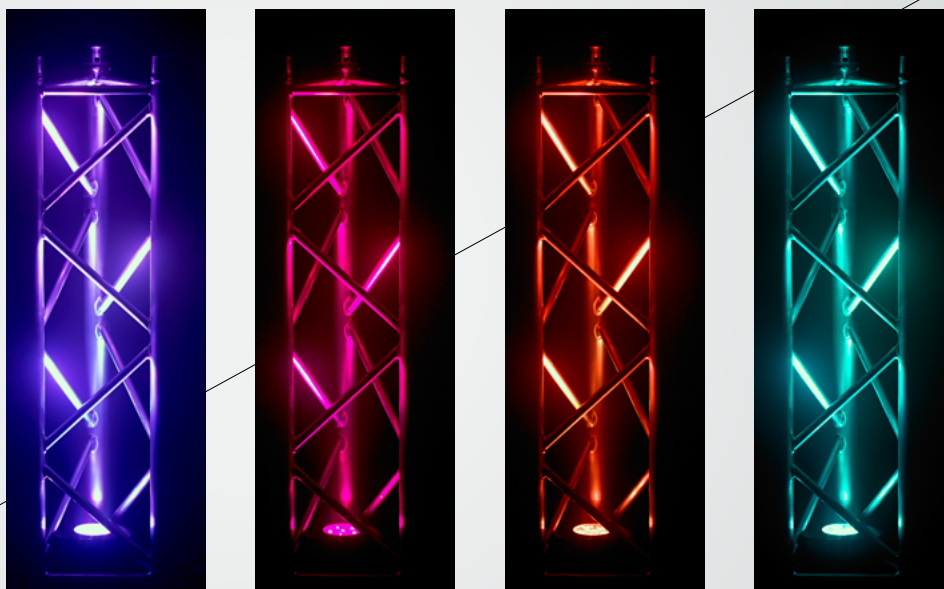

Daisy-chaining

The MINITRUSS-6TCb features power input and output sockets allowing you to daisy-chain more devices.

Technical specifications

- Light source: 3w 6 RGB LEDs
- LED: RGB 3-in-1
- Expected lifespan of 30.000 hours
- Low temperature, low power consumption, can be operated non-stop for many hours
